DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-23 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Amended independent claims 1, 8, 15 include newly added limitation "in which the program logic determines **solely** in accordance with predetermined conditions, **the device having set the predetermined conditions in advance**". This feature is not disclosed in the specification. The specification (pages 23-27) discloses an auto-focus function in a digital camera according to figures 6A and

6B. The specification states that in step 100, the current shooting mode (corresponding to the shooting mode that was pre-selected by photographer operation of buttons) is acquired. Next, in step 102, the focusing lens is moved to an auto-focus start position in accordance with the acquired shooting mode (specification page 23). Therefore, it can be seen that the program logic described in the specification (page 23) does not determine a start point **solely** in accordance with predetermined conditions that are **set in advance by the device**. Rather, the program logic described in the specification states that the shooting mode that determines the auto-focus start position is selected by photographer operation of various buttons. This contradicts the claim language that the device sets the predetermined conditions in advance.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
